Precinct Voting History Analysis

This report contains voting history information for up to the last six years, including both the general elections and the primaries for each year. It consists of three main sections: an information section that details specifics about the precinct, a total voter count section, and a vote history section. Where multiple cities or wards make up a district, each ward or city is sub-totaled at the end of that section.

The general report analyzes all voters irrespective of party affiliation. We do have voter history analyses available by party in most states. Contact *Labels & Lists, Inc.* directly for a free copy of one of these reports.

Column Name	Description
Precinct	While many counties assign descriptive names to their precincts or voting districts, others designate them by number only. Where possible we use the official precinct designation for the county.
LD	The legislative district of the precinct.
SD	The senate district of the precinct.
CD	The congressional district of the precinct.
Total Voters or	This is the total number of registered voters in the precinct
Total -*p* Voters	*p* is the party affiliation code: "D, R or I" if *p* is not present the analysis if for all registered voters.

Vote Counts in Precincts

Gen (*yy)*   Total number of currently registered voters who voted in
                                                    that general election.

Prim (*yy)*   Total number of currently registered voters who voted in
                                                    that primary election.

Note: When zeros are reported in this analysis, the county does not provide voting history
          for the area.

Additional voter analyses are available upon request. These reports include "Cross-Tabulated Analyses", "Party Analyses", and "Voter Turnout Analyses". We also have these reports available for Congressional, Legislative and Senate Districts as well as County and State level reports.

The "Cross-Tabulated Analysis" is a detailed analysis of a district evaluating 45 separate elements including age, voting history, gender, party, etc.

The "Party Analysis" is a precinct level report that details individual and household counts by party identification. It also provides a count of available phone numbers by precinct.

The "Voter Turnout Analysis" offers precinct level analyses of voter turnout by party affiliation and vote date.

If you would like any of these additional reports or information regarding our services please call us at 1-800-842-LIST(5478).
